FREJA eID RELEASE NOTES

These Release Notes describe all the changes made to the Freja eID systems from the previous release. They include:

- Updates to the web portal [My Pages/Mina Sidor](#).

Summary

- [My Pages Redesign](#) – We have updated the My Pages portal with a fresh new design and a better user experience.

My Pages Redesign

We have updated the web portal My Pages with a completely new design that is more modern, user friendly and consistent with the Freja eID mobile application. The entirety of My Pages has been updated, except for the Login page whose design we feel already reflects this design philosophy.

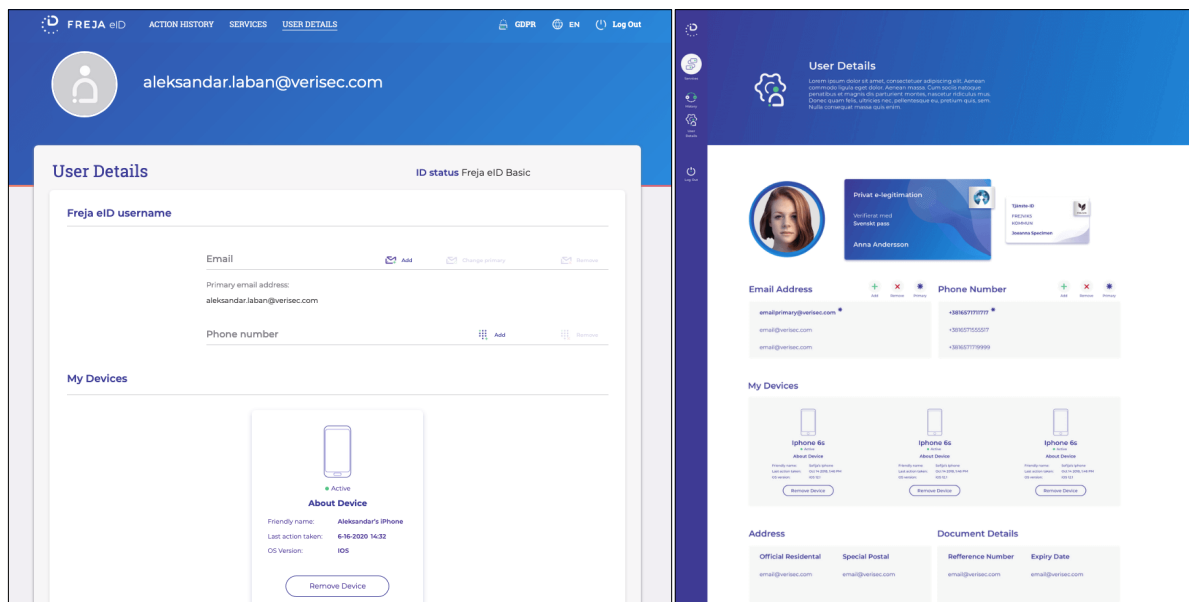

Another important design improvement is that this My Pages redesign fully accommodates for mobile view.

Finally, the functionality of My Pages remains the same so users who are familiar with My Pages already should be able to use it in the same way to check their user details, their action history, and the services available to them.

Below is a summary of each page redesign, as well as the old design depicted on the left and the new on the right.

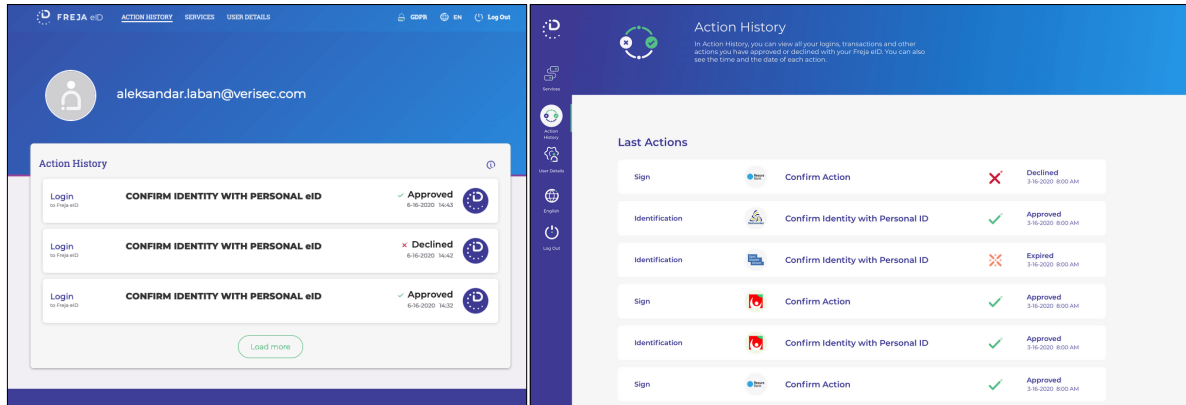

User Details

The User Details page has been updated to give users a better overview of their data. We have also included the user's data that was not shown previously, such as the user's photo, personal eID and any Organisation eID they might have.

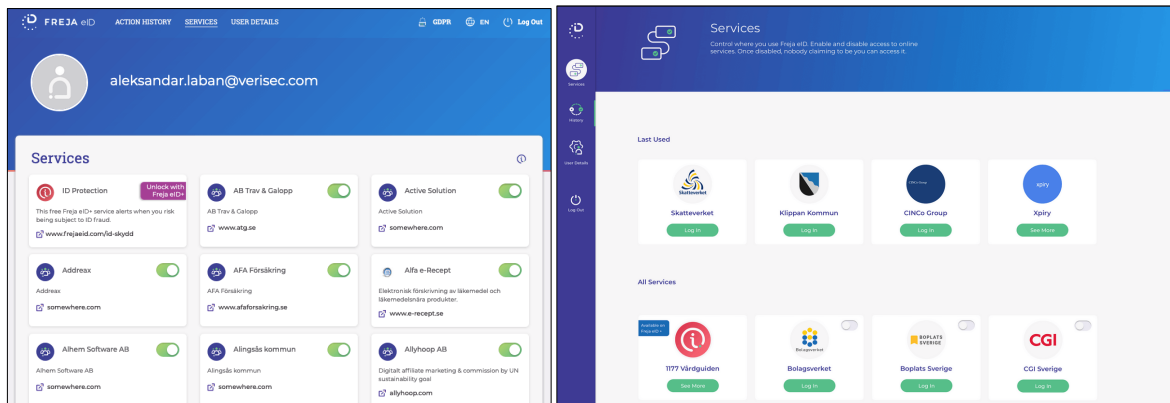

Action History

The Action History page has been updated to show more clearly to the user what service they used, the type of action it was (login, sign etc.), and the status of the action, whether it was approved by the user, declined or expired.

Services

The services page has been updated to better visually present the services available to users, and to make the list of service more easily navigable.

ANY QUESTIONS?

If you have any questions regarding this release, please get in touch with your contact at Verisec or send an email to partnersupport@frejaeid.com. You can also find more useful information about Freja eID on our website www.frejaeid.com.
