FREJA RELEASE NOTES

These Release Notes describe all the changes made to Freja systems from the previous release. They include:

- Updates to the Freja mobile application from version 10.4 to 10.5 on both Android and iOS.

Summary

- REGISTRATION TO FREJA+ WITH BIOMETRIC PASSPORT

We have made it possible for users to get Freja+ directly by using their biometric passport

Registration to Freja+ with Biometric Passport

We have made it possible for users to get Freja+ directly by registering their Sweish **passport** in Freja.

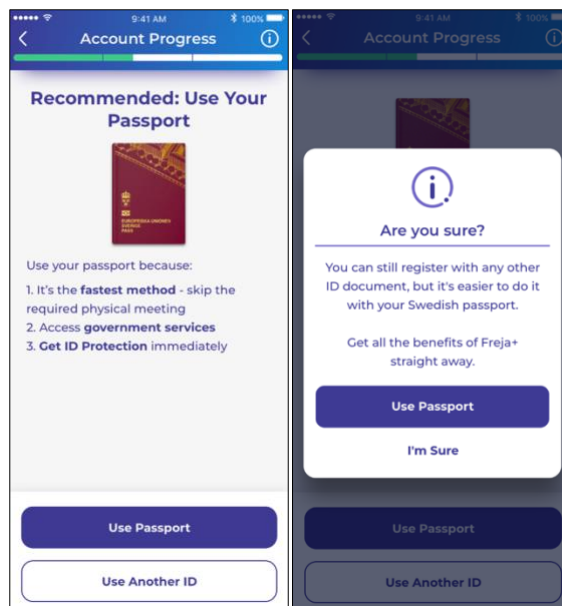

Previously, users had to visit one of our Freja agents in order to get Freja+. This was, and still is, a requirement from the Swedish government when it comes to security.

In summary when it comes to registration:

- With a passport, people will get Freja+ immediately without needing to visit one of our agents;
- With any other ID document the process remains the same; add an ID document to Freja, then visit a Freja agent for Freja+.

Procedure for passports:

In the registration process, after the user has chosen their country, we will recommend that they use their passport. **The main benefit of this is that they will be able to get Freja+ from the comfort of their home – no in-person meeting required.**

Procedure for all other ID documents:

The procedure for all other supported ID documents (Swedish National ID, driving licence, Skatteverket identity card) remains the same.

Important note regarding the issuing of Freja+

Even though using a passport is considered more secure than the other ID documents, we still need to perform background checks of the user during registration.

It may happen in a small number of cases that despite using their passport, the user might not get Freja+ and will still need to do the in-person security check at one of our agents.
