FREJA eID RELEASE NOTES

These Release Notes describe all the changes made to the Freja eID systems from the previous release. They include:

- Changes from version 5.3.0 to 5.4.0 of the Freja eID mobile app on iOS.
- Changes from version 5.5.0 to 5.6.0 of the Freja eID mobile app on Android.

SUMMARY

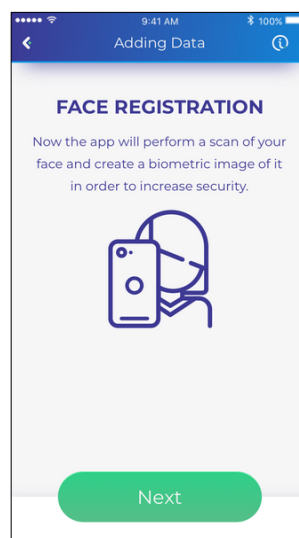

- **YOUR AVATAR IN FREJA eID** – We have improved face registration during the process of adding an ID document to Freja eID. Previously people had to choose one of the photos from the security face scan. Now they can take a photo of themselves that better represents their personal e-ID.

YOUR AVATAR IN FREJA eID

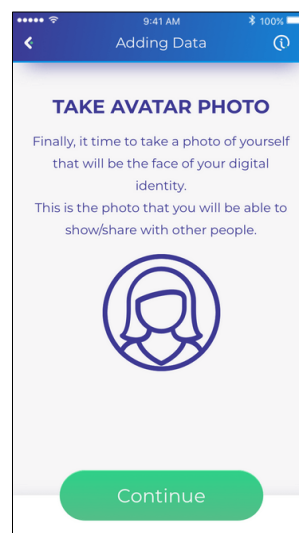

Face registration in Freja eID has been improved. Users will now encounter clearer content and a process that is divided into two logical steps.

1. Face scanning as a security measure, and
2. Taking a high-quality avatar photo to be the face of their e-ID.

As before, people will have to perform a security face scan first. This step remains unchanged from before.

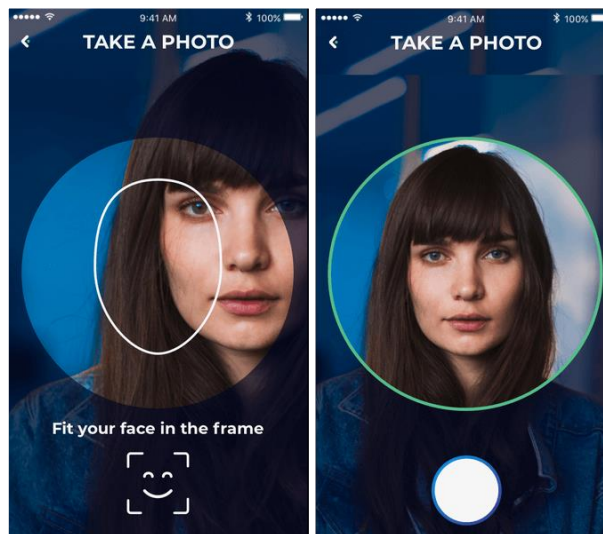

After doing the face scan, people will get another info screen that explains the next step where they have to take an avatar image of themselves.

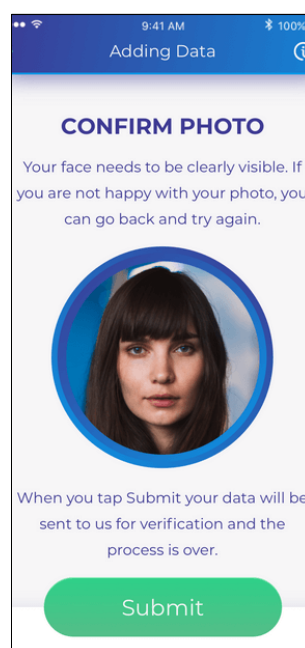

Before, people would just be given a set of pictures from the face scan and have to choose one. These pictures were not the best quality as the face scan requires people to move their head around.

Now the face scan and the avatar photo are completely separate actions in the process, allowing both security and for people to be satisfied with the image representing their e-ID.

We have kept the interface simple and user friendly with clear instructions and indicators. When the user has fit their face inside the frame, the instruction will be replaced by a camera button.

After taking a photo, the user will be able to see exactly what it will look like in Freja eID and be able to go back to retake their photo if they are not satisfied. Additionally, the content on the final info screen has been clarified to help the user understand that they are at the end of the process and that they will be submitting their data for verification.

ANY QUESTIONS?

If you have any questions regarding this release, please get in touch with your contact at Verisec or send an email to partnersupport@frejaeid.com. You can also find more useful information about Freja eID on our website www.frejaeid.com.
