FREJA eID RELEASE NOTES

These Release Notes describe all the changes made to the Freja eID systems from the previous release. They include:

- Changes from version 6.0 to 6.1 of the Freja eID mobile app on iOS.
- Changes from version 6.0 and 6.1 of the Freja eID mobile app on Android

Summary

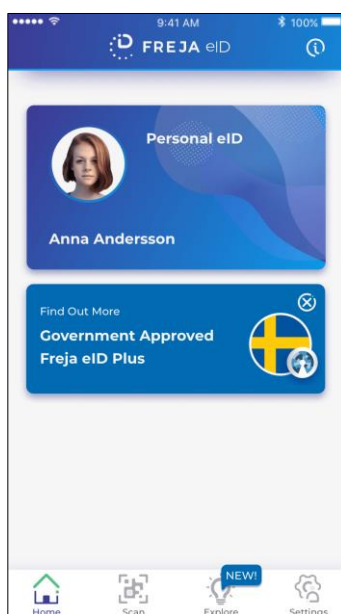

- [Explore Freja eID](#) – We are adding a new feature in the Freja eID mobile app that will help users explore Freja eID and what it has to offer.

Explore Freja eID

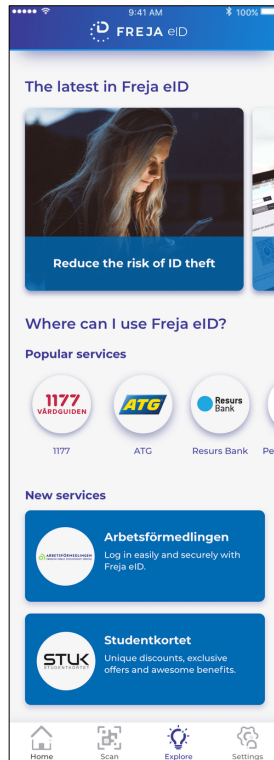

The 'Explore' feature in Freja eID will be an exciting place for users of Freja eID new and old. The idea behind this feature comes from the need to bring Freja eID closer to its users and allow them to be aware of the latest news and developments in Freja eID as well.

The Explore option or tab is accessible from the main screen and there they will be able to find out about:

- the latest news and developments in Freja eID at a glance
- the most popular services available to them in Freja eID
- the newest services that have come on board Freja eID

Tapping the Explore button users will come to the following screen:

The first section focuses on the latest news and developments in Freja eID. These news will come from the Freja eID website and the type of news planned are news about new features and how they can be used, new partnerships, and a wide variety of blogs concerning digital security etc.

Next, people will be able to see the services that are available in Freja eID. As always, people will be able to see the complete list of the services they can use in My Pages. Still, we felt that it would be convenient to users to showcase some of the most popular services available in Freja eID inside the mobile app as well. Tapping the icon of one of the services will take people to the service's website.

Finally, there is a dedicated space for the latest services that have joined Freja eID. This is a useful space where people can always be on top of the latest services available in Freja eID, with a short description of it. Again, tapping the icon of the service will take users to its website.
