FREJA eID RELEASE NOTES

These Release Notes describe all the changes made to Freja eID systems from the previous release. They include:

- Updates to the Freja eID mobile application from version 6.9 to 6.10 on both Android and iOS.

Summary

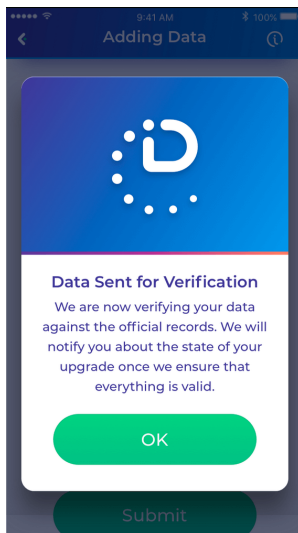

- POPUP REDEISGN

We have redesigned the many popups that occur in the Freja eID mobile app in order to improve user experience. The improvements are strictly visual, please see below for more details.

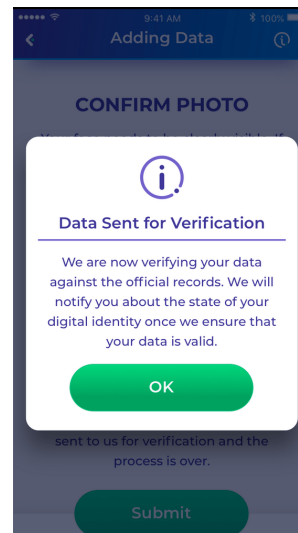

Popup redesign

Popups in Freja eID have been redesigned to improve user experience. The colour, layout, and button contrast have all been modified to better reflect their purpose in the app, to give information or guide people to the correct place in the app.

More importantly, we paid special attention to the popups that appear when the user completes a login action in the app successfully, whether they approve or decline. It should now be clearer to the user what the outcome of their action was.
