# FREJA eID RELEASE NOTES

---

These Release Notes describe all the changes made to Freja eID systems from the previous release. They include:

- Updates to the Freja eID mobile application from version 6.8 to 6.9 on both Android and iOS.

## Summary

- CONTENT IMPROVEMENTS

In order to improve user experience during onboarding, we have modified and clarified the content on some of the initial screens in the app. Please see below for more details.

- WRONG DOCUMENT POPUP

In certain cases it is possible for us to detect when users have made the mistake of choosing one ID document but are trying to add another. We have clarified the popup for this to help guide users to the correct one. Please see below for more details.

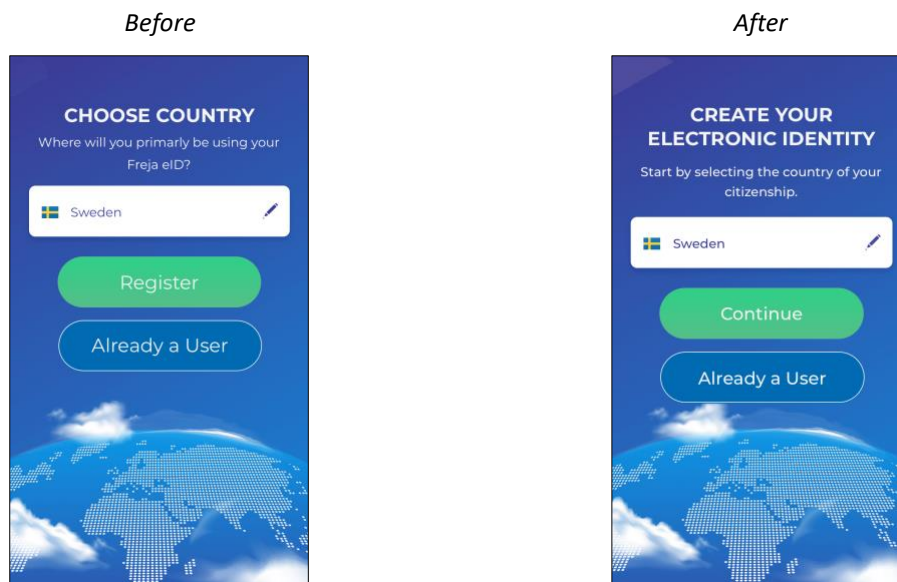

- VERTICAL SIS ID NO LONGER SUPPORTED

The vertical SIS ID document can no longer be used in the Freja eID app for registration. Please note that the horizontal SIS ID document is still supported.

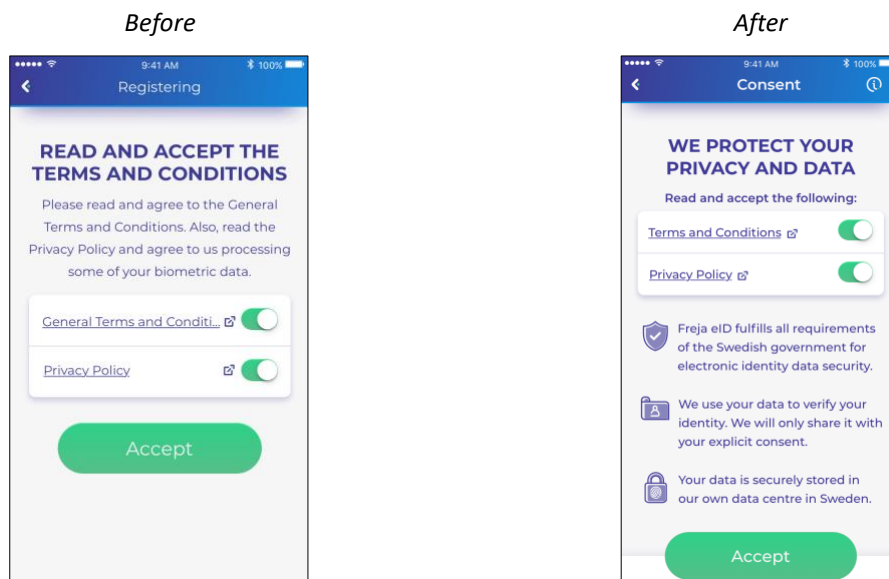

## Content improvements

In order to improve user experience during onboarding, we have modified and clarified some content on the initial screens during account creation in the Freja eID app.

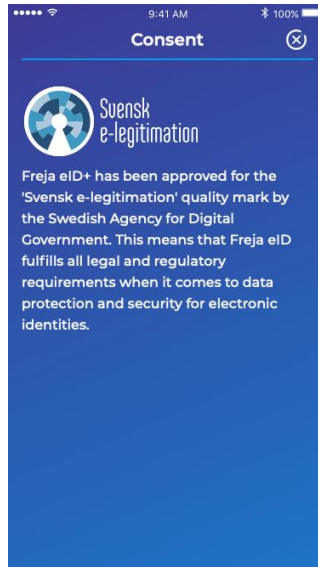

Users should now have a clearer idea of what to do and expect on the **very first screen in the app** where they need to select their country.

The **terms and conditions screen** has also been cleaned up content-wise. We have also added content regarding privacy and data security as a quick summary of our privacy policy so that users can understand it at a glance.

Finally, we have added a new drop-down header with more information about our security background and certification.

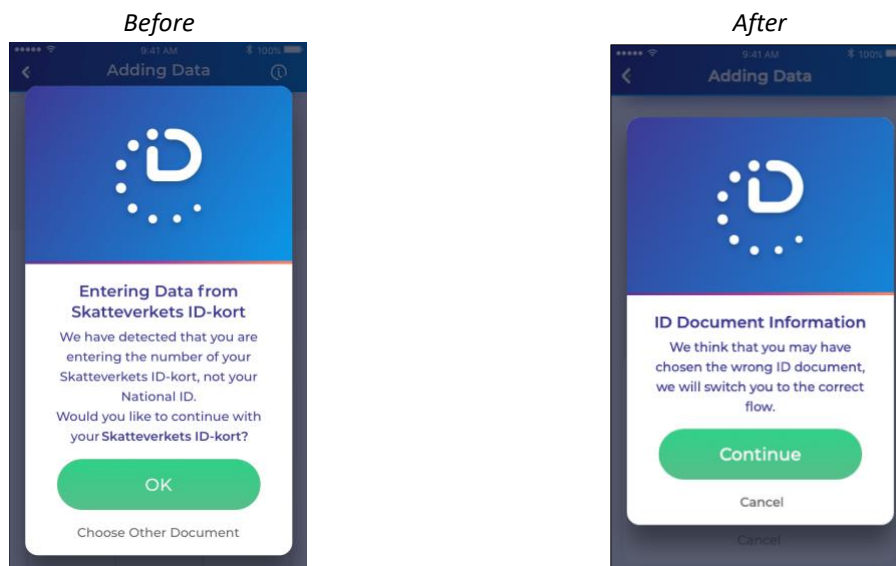

Other than that, the registration flow remains the same and requires the user to verify their email, set a PIN etc.

## Wrong document popup

When a user is adding their ID document to Freja eID they sometimes make a mistake when choosing a document. We found that some users do not differentiate between their National ID card, Skatteverkets ID-kort and their SIS ID, and then fail during the verification step because the data does not match.

We have modified and clarified the existing popup for this to help guide users to add the correct ID document.

---

## ANY QUESTIONS?
